

KS5 – Year 13 – Geography A Level

Term	Topic Titles	Brief Overview
1	Hazards	Students will learn about the nature, causes, impacts, and management of natural hazards, including geological and meteorological phenomena.
2	Water and Carbon	Students will learn about the significance and interrelationships of the water and carbon cycles in the Earth's systems and their influence on global environmental change.
	Global Governance	Students will learn about the complexity of global systems, such as trade and migration, and the role of global governance in addressing global issues and inequalities.
3	Revision and consolidation	In the final few weeks before external exams start, students focus on structured revision activities.
